CRAFT IN AMERICA

CELEBRATING TWO CENTURIES OF ARTISTS AND OBJECTS

JO LAURIA AND STEVE FENTON PROLOGUE BY PRESIDENT JIMMY CARTER

For the millions of Americans who collect and study craft, *Craft in America*, the companion book to an upcoming PBS special and traveling exhibit of the same name, explores the significance of craft in the last 200 years.

The only work of its kind, *Craft in America* features the art of America's most original and esteemed craftspeople past and present. Illustrated with 200 stunning photographs and encompassing objects, from furniture, wood, and ceramics to glass, fiber, jewelry, metal, and basketry, this definitive work showcases some of the greatest works of the last two centuries and explores what makes American crafts uniquely American.

With an eye for how craft has contributed to America's vitality, history, and identity, *Craft in America* examines:

- Crafts as communicator
- The evolution of American crafts
- Communities of craftspeople, from religious communities such as the Shakers and the Amish to philosophical and native groups
- And much more

Craft in America chronicles how handmade objects in our culture both unite and define us as Americans.

Available October 2007 wherever books are sold.
